

Before plugging in the EnergyCrusher™ our electric bills were about \$800.00 to \$900.00 per month. Since plugging it in, they have continued to decrease; down to about \$500.00 to \$600.00 per month now. We have saved well over 12% on our bill and would recommend the EnergyCrusher™ to anyone who needs to reduce their electric bill.

— Shirlee Finnell, Owner Finnell's Autobody

## Designed to Save You Money

Use energy more efficiently in your home and help prolong the life of your appliances with the Energy Crusher. Guaranteed to save you money! If you have any of these appliances in your home, the Energy Crusher can reduce your electric bill by at least 8% guaranteed.

Refrigerators & Freezers

Washers & Dryers

Dishwasher

Heating and Air Conditioning

Swimming Pool

Hot Tub

Sump, Well & Septic Pumps

Attic Fans

Home and Personal Appliances

## Where to Install?

Installation is as easy as plugging the Energy Crusher into the outlet next to your home's main breaker panel. This assures that the Energy Crusher is nearest to the your homes incoming power.

If that location is not available, the Energy Crusher should be placed nearest to or on the same circuit as your largest inductive loads; usually in the kitchen or laundry room.

## Frustrated with Rising Electric Bills?

Simply plug the Energy Crusher into a standard power outlet and instantly increase the efficiency of your home and reduce your energy consumption by 8% guaranteed.

The Energy Crusher uses capacitance to absorb surges and transients in your homes incoming power, and provides corrective current to help improve the power factor of the motors in the common appliances you use everyday. This helps to increase the efficiency and reduce the amount of energy needed to run the biggest appliances in your home, like refrigerators and air conditioning units.

The Energy Crusher is also able to help decrease the initial surge impact on the motors in all these appliances. So, not only can the Energy Crusher help your appliances run more efficiently everyday, but you can also help to increase their lifespan.

## Help Reduce Harmful EMFs

In addition to helping increase the efficiency of your home, the Energy Crusher can help drastically reduce the presence of harmful EMFs.
